

All-in-One Tablet POS Platform

- Universal Tablet POS
- 2D QR/Barcode Scanner
- Thermal Printer
- Cash Drawer
- Single Power Cable Design

Take Advanced Payments

PowaPOS T25 is the first truly all-in-one point of sale system designed as a turnkey solution for merchants to take advantage of emerging tablet-based POS applications. Unlike other tablet systems, the T25 incorporates all common retail

peripherals into a single, elegant and ergonomic form, requiring less counter space and reducing cost. An advanced Software Developers Kit enables iOS, Android or Windows 8 developers to easily integrate their applications.

EMV Payment Terminal

2D QR/Barcode Scanner

Thermal Printer

Cash Drawer

PowaPOS SDK

PowaPOS T-Series payment solutions are designed to work seamlessly with your existing tablet application, providing a more efficient and ergonomic hardware platform which enhances usability and lowers total cost of ownership.

As a single API for all of your device and payment system interfaces, PowaPOS SDK provides developers with a simple integration solution for your application to the T-Series hardware. Standard interfaces are provided for the integrated printer, barcode scanner and cash drawer.

In addition, PowaPOS SDK can provide support for a growing list of third party PINpads and other peripherals when required.

PowaPOS SDK has also been implemented to address the ongoing costs associated with PCI-DSS compliance by establishing an out-of-scope environment for integrated payment applications. By providing a secure

and firewalled interface to PCI devices, PowaPOS SDK allows software providers to save thousands of dollars in ongoing assessment and certification fees.

Compatible with third party PINpad devices

Product Specifications

Universal Tablet Operating Systems Support	iOS • Android • Windows 8.1
Tablet Options	Option 1: iPad Air mount (tablet not included) Option 2: Powa Android tablet (tablet included) Option 3: Universal Android or Windows tablet mount (tablet not included)
Integrated Printer	Industry Standard, 80mm Width, 3" diameter roll (~70M Length), 100mm/sec, easy drop in loading, metallic tear bar
Integrated 2D QR/Barcode	Integrated 2D imager. Hands free scanning in bi-directional cradle or can be picked up for wireless/portable operation (Bluetooth 2.0)
Integrated Cash Drawer	Space Saving Design, 5 notes, 6 coin trays, 24V
Integrated Payment Terminal	Integrated PowaPIN supports, Chip and Signature, Magnetic Stripe credit & PIN debit, Encrypted MSR (Magnetic stripe reader), PCI PTS (with SRED), CAS POI, CE (R&TTE Directive) / IEC 60950-1, Bluetooth EPL Listed, Apple MFi Certified
Single Cable Installation	A single cable plugs into the electrical outlet for ease of installation right out of the box.
Secure Device Locking	Compatible with Kensington locks.
Peripheral Expansion Ports	1 USB 2.0/1A supply 1 USB 2.0/500ma supply 24V cash drawer Interface
3rd Party Device Support	Supports VeriFone, Ingenico, Worldline and PAX PINpad devices via USB peripheral port expansion hub. Also capable of supporting other 3rd party devices such as scanners, scales, printers, etc.
