

NP2160

Touch POS Terminal

The Nexa NP-2160 All in One terminal packs great features, versatility and value into a sleek and neat design. It enhances the atmosphere of any business while providing excellent performance and reliability.

With a unique and easily removable system core, (motherboard, RAM, SSD), the NP-2160 is effortless to service, allowing a complete swap out of these components in as little as 30 seconds!

Adding to the NP-2160's premium feature set, it uses the world's leading touch screen technology, Projected Capacitive, (PCAP). Where many Pos Terminals use a resistive touch overlay that is subject to physical wear or accidental damage, PCAP touch has no overlay, so these potential points of failure are removed, giving greater length of life and reliability.

Aluminium-Zinc alloy case, fan free, easy servicing, sleek and slim - the NP-2160 sets a new standard in POS technology!
